DETAILED ACTION

Information Disclosure Statement

1. The IDS is acceptable.

Drawings

2. The objections to the drawings are hereby withdrawn.

Specification

3. The objections to the drawings are hereby withdrawn.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-5 and 7-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steiner et al (4,641,557), hereafter Steiner in view of Denman (5,662,019). Steiner discloses cutting blade 29; the cutting assembly moves along a pivot axis, a vertical axis, a bevel axis and a transverse axis as shown on the computer controller in figure 3A; the apparatus is capable cutting the workpiece at a bevel angle using a stab cut by simultaneously moving the workpiece long its longitudinal axis manually and moving the cutter along the vertical axis with the computer; the apparatus is capable of cutting the workpiece at other than a ninety degree bevel cut; the apparatus is capable of using a stab cut in combination with a transverse cut; the apparatus is capable of having a maximum cut length greater than the length of the bevel cut, and is capable of having a maximum cut length of at least ten inches; the apparatus is capable of

Art Unit: 3724

making a scarf cut on the workpiece. Steiner discloses everything, but does not disclose a linear feed assembly, however, Denman teaches linear feed assembly 28. It would have been obvious to provide a linear feed assembly in Steiner as taught by Denman in order to provide a safety device wherein a user does not have to bring his hands close to the blade.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Steiner, as applied to claims 1-5 and 7-16 above, and further in view of Pyle (6,212,983). Steiner discloses everything as noted above, but does not disclose feed assemblies, however, Pyle teaches feed assemblies 32 and 36. It would have been obvious to provide feed assemblies in Steiner as taught by Pyle in order to convey heavy workpieces to the cutting apparatus.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3724

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 571-272-4509. The examiner can normally be reached on Monday through Friday between 8am and 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
